Article 6

Wholly obtained products

1. Within the meaning of Article 2 (1) (a) and (2) (a), the following shall be considered as wholly obtained either in Turkey or in Morocco.

Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in the list for that product, is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account that be taken of the non-originating materials which may have been used in its manufacture.

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonized System under a single heading, the whole constitutes the unit of qualification;
 - (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonized System, each product must be taken individually when applying the provisions of this Protocol.

9. The customs authorities of the exporting State may declare certain categories of goods ineligible for the special treatment provided for in paragraph 2.
10. The customs authorities shall refuse the authorization referred to in paragraph 2 to exporters who do not offer all the guarantees which they consider necessary. The competent authorities may withdraw the authorization at any time. They must do so where the approved exporter no longer satisfies the conditions or no longer offers these guarantees.
11. The approved exporter may be required to inform the competent authorities, in accordance with the rules which they lay down, of the goods to be dispatched by him, so that such authorities may make any verification they think necessary before the departure of the goods.
12. The customs authorities of the exporting State may carry out any check on approved exporters which they consider necessary. Such exporters must allow this to be done.

-
13. The provisions of this Article shall be without prejudice to the application of the rules of Turkey and Morocco concerning customs formalities and the use of customs documents.

Article 23

Information certificate and declaration

1. When Articles 3, 4 and 5 are applied for the issue of an EUR.1 movement certificate the competent customs office in the State requested to issue the certificate for products in the manufacture of which products coming from Algeria, Tunisia or Turkey are used, shall take into consideration the declaration, of which a specimen is given in Annex VI, given by the exporter in the State from which it came, either on the commercial invoice applicable to these products, or on a supporting document to that invoice.
2. The submission of the information certificate, issued under the conditions set out in paragraph (3) and of which a specimen is given in Annex VII, may however be requested of the exporter by the customs office concerned, either for checking the authenticity and accuracy of information given on the declaration provided for in paragraph 1, or for obtaining additional information.
3. The information certificate concerning the products taken into use shall be issued at the request of the exporter of these products, either in the circumstances envisaged in paragraph (2), or at the initiative of this exporter, by the competent customs office in the State from which these goods were exported. It shall be made out in duplicate. One copy shall be given to the exporter who has requested it, who shall send it either to the exporter of the final products or to the customs office where the issue of the EUR.1 movement certificate for these products has been requested. The second copy shall be preserved by the office which has issued it for at least three years.

Article 24

Validity of proof of origin

1. An EUR.1 movement certificate shall be valid for four months from the date of issue in the exporting country, and must be submitted within the said period to the customs authorities of the importing country.
2. EUR.1 movement certificates which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the

failure to submit these documents by the final date set is due to reasons of *force majeure* or exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the EUR.1 movement certificates where the products have been submitted to them before the said final date.

Article 25

Submission of proof of origin

EUR.1 movement certificates shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of an EUR.1 movement certificate or an invoice declaration. They may also require the import declaration to be accompanied by a statement from the importer to the effect that the goods meet the conditions required for the implementation of the Agreement.

Article 26

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonized System falling within chapters 84 and 85 of the Harmonized System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

Article 27

Invoice Declaration

1. Notwithstanding Article 17, the evidence of originating status, within the meaning of this Protocol may be given by an invoice declaration, the text of which appears in Annex IV to this Protocol, made by the exporter on an invoice, a delivery note or other commercial document (hereafter referred to as 'invoice declaration') describing the products concerned in sufficient detail as to permit the identification of consignments containing only originating products and whose value does not exceed Euro 5110 per consignment.
2. The invoice declaration shall be completed and signed by the exporter or, under the exporters responsibility, by his authorized representative in accordance with this Protocol.
3. An invoice declaration shall be completed for each consignment.

-
4. The exporter who applied for the invoice declaration shall submit at the request of the customs authorities of the exporting State all supporting documents concerning the use of this form.
 5. Article 24 and 25 shall apply *mutatis mutandis* to the invoice declaration.

Article 28

Exemptions from formal proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a formal proof of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Protocol and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on the customs declaration CN22/CN23 or on a sheet of paper annexed to that document.
2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.
3. Furthermore, the total value of these products must not exceed Euro 500 in the case of small packages or Euro 1200 in the case of products forming part of travellers' personal luggage.

Article 29

Preservation of proof of origin and supporting documents

1. The exporter applying for the issue of an EUR.1 movement certificate shall keep for at least three years the documents referred to in Article 18(1) and (3).
2. The exporter making out an invoice declaration shall keep for at least three years a copy of this invoice declaration as well as the documents referred to in Article 27(1).

-
3. The customs authorities of the exporting country issuing an EUR.1 movement certificate shall keep for at least three years the application form referred to in Article 18(2).
 4. The customs authorities of the importing country shall keep for at least three years the EUR.1 movement certificate submitted to them.

Article 30

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in an EUR.1 movement certificate, or in an invoice declaration and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the EUR.1 movement certificate, or the invoice declaration null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on an EUR.1 movement certificate, or an invoice declaration should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 31

Amounts expressed in EURO

1. Amounts in the national currency of the exporting country equivalent to the amounts expressed in Euro shall be fixed by the exporting country and communicated to the other Contracting Parties.

When the amounts exceed the corresponding amounts fixed by the importing country, the latter shall accept them if the products are invoiced in the currency of the exporting country or in the currency of one of the other countries referred to in Article 4 of this Protocol.

2. Up to and including 30 April 2008, the amounts to be used in any given national currency shall be the equivalent in that national currency of the amounts expressed in Euro as at 1 October 2003.

For each successive period of five years, the amounts expressed in Euro and their equivalents in the national currencies of the States shall be reviewed by the Joint Committee on the basis of the exchange rates of the Euro as at the first working day in October in the year immediately preceding that five-year-period.

When carrying out this review, the Joint Committee shall ensure that there will be no decrease in the amounts to be used in any national currency and shall furthermore consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in Euro.

TITLE V

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION

Article 32

Communication of stamps and addresses

The customs authorities of Turkey and of Morocco shall provide each other with specimen impressions of stamps used in their customs offices for the issue of EUR.1 certificates and with the addresses of the customs authorities responsible for issuing EUR.1 movement certificates and for verifying those certificates and invoice declarations.

Article 33

Verification of EUR.1 movement certificates and of invoice declaration and information certificate

1. Subsequent verification of EUR.1 movement certificates and invoice declarations shall be carried out randomly or whenever the customs authorities of the importing state have reasoned to doubt the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.
2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the EUR.1 movement certificate, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons of substance or form for an inquiry.

In order to assist with the verification, the customs authorities shall provide all the necessary documents and any information collected which indicate that the information on the EUR.1 certificate or the invoice declaration are incorrect.

3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check which they consider appropriate.

-
4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, they shall offer to release the products to the importer subject to any precautionary measures judged necessary.
 5. The customs authorities requesting the verification shall be informed of the results of this verification within a maximum of ten months. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as originating products and fulfil the other requirements of this Protocol.
 6. If in cases of reasonable doubt there is no reply within ten months or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.
 7. The subsequent verification of information certificates provided for by Article 23 shall be carried out in the cases mentioned in paragraph 1 and in accordance with the procedures laid down in paragraphs 2 to 6

Article 34

Dispute settlement

Where disputes arise in relation to the verification procedures of Article 33 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Joint Committee.

In all cases the settlement of disputes between the importer and the customs authorities of the importing State shall be under the legislation of the said State.

Article 35

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

Article 36
Free zones

1. Turkey and Morocco shall take all necessary steps to ensure that products traded under cover of an EUR.1 movement certificate, which in the course of transport use a free zone situated in their territory, are not substituted by other goods and that they do not undergo handling other than normal operations designed to prevent their deterioration.
2. By means of an exemption to the provisions contained in paragraph 1, when products originating in Turkey or in Morocco and imported into a free zone under cover of an EUR.1 certificate and undergo treatment or processing, the authorities concerned must issue a new EUR.1 certificate at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this protocol.

TITLE VI

FINAL PROVISIONS

Article 37

Amendments to the Protocol

The Joint Committee may decide to amend the provisions of this Protocol.

Article 38

Sub-Committee on customs and origin matters

A Sub-Committee on customs and origin matters shall be set up under the Joint Committee to assist it in carrying out its duties and to ensure a continuous information and consultation processed between experts.

It shall be composed of experts from both Parties responsible for questions related to customs and origin matters.

Article 39

Annexes

The Annexes and Joint Declaration to this Protocol shall form an integral part thereof.

Article 40

Implementation of the Protocol

Turkey and Morocco shall each take the steps necessary to implement this Protocol.

Article 41

Arrangements with Algeria and Tunisia

The Contracting Parties shall take any measures necessary for the conclusion of arrangements with Tunisia and Algeria enabling this Protocol to be applied. The Contracting Parties shall notify each other of measures taken to this effect.

Article 42

Goods in transit or storage

The provisions of the Agreement may be applied to goods which comply with the provisions of this Protocol and which on the date of entry into force of the Agreement are either in the transit or are in Turkey or in Morocco, insofar as the provisions of Articles 3. 4 and 5 are applicable in Algeria or Tunisia in temporary storage in bonded warehouses or in free zones, subject to the submission to the customs authorities of the importing State, within four months of that date, of a certificate EUR.1 issued retrospectively by the competent authorities of the exporting State together with the documents showing that the goods have been transported directly.

ANNEX I

INTRODUCTORY NOTES

FOREWORD

These notes shall apply, where appropriate, to all manufactured products using non-originating materials, even if they are not subject to specific conditions contained in the list in Annex II but are subject instead to the change of heading rule set out in Article 7(1).

Note 1

- 1.1. The first two columns in the list describe the product obtained. The first column gives the heading number, or the chapter number, used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in Columns 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rule in Columns 3 or 4 only applies to the part of that heading or chapter as described in Column 2.
- 1.2. Where several heading numbers are grouped together in Column 1 or a chapter number is given and the description of product in Column 2 is therefore given in general terms, the adjacent rule in Columns 3 or 4 applies to all products which, under the Harmonised System, are classified within headings of the chapter or within any of the headings grouped together in Column 1.

Note 2

- 2.1. In the case of any heading not in the list or any part of a heading that is not in the list, the "change of heading" rule set out in Article 7(1) applies. If a "change of heading" condition applies to any entry in the list, then it is contained in the rule in Column 3.
- 2.2. The working or processing required by a rule in Column 3 has to be carried out only in relation to the non-originating materials used. The restrictions contained in a rule in Column 3 likewise apply only to the non-originating materials used.
- 2.3. Where a rule states that "materials of any heading" may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression "manufacture from materials of any heading, including other materials of heading No " means that only materials classified in the same heading as the product of a different description than that of the product as given in Column 2 of the list may be used.

2.4.If a product made from non-originating materials which has acquired originating status during manufacture by virtue of the change of heading rule or its own list rule is used as a material in the process of manufacture of another product, then the rule applicable to the product in which it is incorporated does not apply to it.

For example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading No 7224. If this forging has been forged in the country concerned from a non-originating ingot then the forging has already acquired origin by virtue of the rule for heading No ex 7224 in the list. It can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or another. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

2.5.Even if the change of heading rule or the other rules contained in the list are satisfied, a product shall not acquire originating status if the processing carried out, taken as a whole, is insufficient within the meaning of Article 6.

Note 3

3.1.The rule in the list represents the minimum amount of working or processing required and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer origin. Thus if a rule says that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.

3.2.When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

For example:

The rule for fabrics say that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; one can use one or the other or both. If, however, a restriction applies to one material and other restrictions apply to other materials in the same rule, then the restrictions only apply to the materials actually used.

For example:

The rule for sewing machines specifies that both the thread tension mechanism used and the zigzag mechanism used must originate; these two restrictions only apply if the mechanisms concerned are actually incorporated into the sewing machine.

3.3. When a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule.

For example:

The rule for heading No 1904 which specifically excludes the use of cereals or their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not produced from cereals.

For example:

In the case of an article made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn that is the fibre stage.

See also Note 6.3 in relation to textiles.

3.4. If in a rule in the list two or more percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. The maximum value of all the non-originating materials used may never exceed the highest of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4

4.1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres and is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, the term "natural fibres" includes fibres that have been carded, combed or otherwise processed but not spun.

4.2. The term "natural fibres" includes horsehair of heading No 0503, silk of heading Nos 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos 5101 to 5105, the cotton fibres of heading Nos 5201 to 5203 and the other vegetable fibres of heading Nos 5301 to 5305.

4.3. The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

4.4. The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings Nos 5501 to 5507.

Note 5

5.1. In the case of the products classified within those headings in the list to which a reference is made to this note, the conditions set out in Column 3 of the list shall not be applied to any basic textile materials used in their manufacture which, taken together, represent 10 % or less of the total weight of all the basic textile materials used (but see also Notes 5.3 and 5.4 below).

5.2. However, this tolerance may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus *Agave*,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- synthetic man-made staple fibres,
- artificial man-made staple fibres.

For example:

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 % of the yarn.

For example:

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used up to a weight of 10 % of the fabric.

For example:

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

For example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

For example:

A carpet with tufts made from both artificial yarns and cotton yarns and with a jute backing is a mixed product because three basic textile materials are used. Thus, any non-originating materials that are at a later stage of manufacture than the rule allows may be used, provided their total weight taken together does not exceed 10 % of the weight of the textile materials in the carpet. Thus, both the jute backing and/or the artificial yarns could be imported at that stage of manufacture, provided the weight conditions are met.

5.3. In the case of fabrics incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20 % in respect of this yarn.

5.4. In the case of fabrics incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two films of plastic film, this tolerance is 30 % in respect of this strip.

Note 6

6.1. In the case of those textile products which are marked in the list by a footnote referring to this note, textile materials with the exception of linings and interlinings which do not satisfy the rule set out in the list in Column 3 for the made-up products concerned may be used provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.

6.2. Materials which are not classified within Chapters 50 to 63 may be used freely, whether or not they contain textiles.

For example:

If a rule in the list provides that for a particular textile item, such as trousers, yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners even though slide-fasteners normally contain textiles.

6.3. Where a percentage rule applies, the value of trimmings and accessories must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7

7.1. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:

(a) vacuum distillation;

(b) redistillation by a very thorough fractionation process;

(c) cracking;

(d) reforming;

(e) extraction by means of selective solvents;

(f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;

(g) polymerisation;

-
- (h) alkylation;
 - (i) isomerisation.

7.2. For the purposes of heading Nos 2710, 2711 and 2712, the "specific processes" are the following:

- (a) vacuum distillation;
- (b) redistillation by a very thorough fractionation process;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (ij) isomerisation;
- (k) (in respect of heavy oils falling within heading No ex 2710 only) desulphurisation with hydrogen resulting in a reduction of at least 85 % of the sulphur content of the products processed (ASTM D 1266-59 T method);
- (l) (in respect of products falling within heading No 2710 only) deparaffining by a process other than filtering;
- (m) (in respect of heavy oils falling within heading No ex 2710 only) treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolorisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (n) (in respect of fuel oils falling within heading No ex 2710 only) atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C by the ASTM D 86 method;
- (o) (in respect of heavy oils other than gas oils and fuel oils falling within heading No ex 2710 only) treatment by means of a high-frequency electrical brush-discharge.

7.3. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations such as cleaning, decanting, desalting, water separation,

filtering, colouring, marketing obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.
